

## Courses

### Basic JavaScript

JavaScript is a scripting language you can use to make web pages interactive. It is one of the core technologies of the web, along with HTML and CSS, and is supported by all modern browsers.

In this course, you'll learn fundamental programming concepts in JavaScript. You'll start with basic data structures like numbers and strings. Then you'll learn to work with arrays, objects, functions, loops, if/else statements, and more.

- ▼ Collapse course 113/113
- ✔ Comment Your JavaScript Code
  - ✔ Declare JavaScript Variables
  - ✔ Storing Values with the Assignment Operator
  - ✔ Assigning the Value of One Variable to Another
  - ✔ Initializing Variables with the Assignment Operator
  - ✔ Declare String Variables
  - ✔ Understanding Uninitialized Variables
  - ✔ Understanding Case Sensitivity in Variables
